Deliverable: Proof Statement

I engineer predictive features from financial time-series data. I am presenting this so a Senior Machine Learning Engineer at a financial services company will review my code repository and email me to schedule a technical screening.

Why This Needs to Exist

A university transcript states that I study data science and ensemble learning frameworks, but this proves my algorithms can actually handle the noise and volatility of real-world market data.

Workspace Setup Evidence

Below is the screenshot confirming the setup of my AI workspace with the custom instructions in Claude:
