

Portfolio Claim & Content Map

Author: Masoom Sakina

Track: General AI Fluency (Week 3)

1. The One-Line Claim

"Data Science student specializing in explainable machine learning and quantitative forecasting for financial markets."

2. Content Map (Pages, Sections & Calls to Action)

Section 1: Hero / Introduction

- **Content:** The one-line claim, personal headshot, and a brief mention of current BS Data Science studies at Emerson University.
- **Call to Action (CTA):** Primary "View ML Projects" button routing to the portfolio grid.

Section 2: Case Studies (The Proof)

- **Case 1:** Explainable Ensemble Learning Framework for Adaptive Financial Market Prediction.
 - *Focus:* Time-series forecasting, quantitative trading algorithms, and SHAP model explainability.
- **Case 2:** Scikit-Learn Data Contract & Signal Audit Pipeline.
 - *Focus:* Robust tabular data validation, handling schema drift, and ML infrastructure.

Section 3: Availability & Contact

- **Content:** Acknowledging current academic schedule and pending university projects while highlighting readiness for Summer 2026 data science internships.
- **Call to Action (CTA):** Secondary Links to GitHub, LinkedIn, and Email for outreach.

3. "Still Need to Gather" List

- High-resolution export of the SHAP summary plot for the financial market prediction case study.
- Final polished PDF of the technical resume (ensuring accurate final year project titles).
- Clean code snippets from the Data Contract pipeline to embed directly into the HTML portfolio.
